I have read many articles about genetic engineering. It seems obvious that it is not safe. I do not want it done to my seeds and my food. And most certainly, if it is done, I want it labeled, so I won't unknowingly buy it. Many other countries are refusing to have genetically engineered food in their stores at all. Our country is pressuring other countries for it. It is disgusting. I demand that any food that is genetically engineered is clearly labeled!
